GARSEF
GREATER AUSTIN REGIONAL SCIENCE AND ENGINEERING FAIR
A Program of the Austin Science Education Foundation

# DISPLAY & SAFETY RULES

## General Guidelines Junior and Senior Divisions

- **No objects other than boards, binders, laptops/tablets and ISEF paperwork requirements are allowed in the exhibit hall. Only paper and photos should be attached to the project board.**
- **The height requirement is 8 ft from the floor.** This means that two boards on top of each other will not fit. Tables are no taller than 36 inches, so the height of the project board should be 60 inches or less.
- All ISEF display and safety guidelines must be followed (with the above additions).
- Every photo and/or visual depiction used to document or illustrate information must have a credit line indicating who took the photo or created the image.
    - Images created by the student(s) must include the application used to create the image and the year the image was created. Example - "Image created by student researcher(s) using Canva, 2027." See ISEF D&S Graphic Credit Guidance for additional examples.
    - ALL graphics not created by the student(s) MUST BE properly cited individually (APA format is preferred). Graphics obtained via the Internet must have URL provided (digital object identifiers are acceptable in place of long URLs). This applies even if the license under which the graphic was obtained does not require credit or citation.
- The official abstract must be displayed vertically at the booth in an acrylic frame or taped to the edge of the table. Senior Division projects that have Forms 2C and/or 7 must also display those forms at the booth vertically.
- Company logos, references to student patents, student published papers, and unofficial abstracts (lacking the SRC signature) are NOT allowed on the project board.
- References to universities, businesses, or mentors who supported the student's research are not allowed on the project board with the exception of the acknowledgment section.
- If a study is a continuation project, information from the previous year's project should be limited to summative conclusionary data but not include raw data or images of prior engineered designs.

## All Divisions:

The following items are prohibited in the exhibit hall:

- **Anything in addition to paper or photos will be removed or the board will be disqualified. Use only paper on your project boards.**
- Images of animals or people in surgical techniques or necropsies or animals not in their natural habitat
- Ribbons, medals, and awards won at previous fairs
- Laser pointers
- Open containers of food and beverages

Student MUST have permission from all people whose photos are displayed.

*If items are removed by Display & Safety, you will be able to retrieve them after judging is finished by bringing the receipt to the D&S tables.*

Thank you for your cooperation,

GARSEF Display & Safety Team
