GARSEF

11/4/26

Timeline:

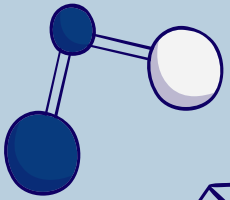

Oct 14, 2026 5:00 pm	**Student: STEM Wizard Account Creation deadline** Milestones 1 & 2 (Project + Student Information)
Nov 18, 2026 5:00 pm	**Student: Files and Forms Recommended Submission**, including pre-approval signatures
Jan 4, 2027 5:00 pm	**Student:** Abstract in “Files and Forms” and Additional Information milestone added in STEM Wizard.
Jan 8, 2027 5:00 pm	**Teacher: Junior/Senior School Pre-Registration Form Submission**
Jan 15, 2027 5:00 pm	**Student: Abstract and Additional Information Milestone Recommended Submission** in STEM Wizard.
Jan 21, 2027 5:00 pm	**Teacher: Project Registration Submission Deadline:** deactivate students who are not advancing to GARSEF in STEM Wizard, and submit Senior Division plagiarism reports. **All milestones** for advancing students must be complete.
Feb 5, 2027 5:00 pm	**Student: Submissions for Judges Review milestone deadline**.

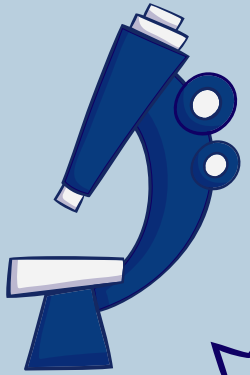

Files and Forms

DUE: NOVEMBER 18TH BEFORE 5PM

Forms

You must complete the questionnaire in the beginning of the “files and forms” milestone that will help determine which forms you need to complete. **Please be honest and as accurate as possible.**

Every project must have the following forms:

- Checklist for Adult Sponsor (1). In coordination with completion by the Adult Sponsor
- Student Checklist (1A)
- Research Plan/Project Addendum
- Approval Form (1B)
- Student Support Disclosure Form (2A)
- Participation Agreement

Forms: Modifications for 2027

- Student Support Disclosure Form (2A) – NEW!
  - This is a new form that is required for all projects. It can be filled out before or after experimentation by the finalist.
- Qualified Scientist Form (2B)
  - Renumbered to be 2B instead of Form
  - Added question about scientist's role in student's research: Please describe your anticipated role in this project and the duration of your support.
- Regulated Research Institutional/Industrial Setting Form (2C)
  - Renumbered to be 2C instead of 1C
  - Added question: What was the duration of your support of this student project?
- Human and Vertebrate Animal Tissue Form (6B)
  - Checkboxes were added to question 1 to provide more tissue options.

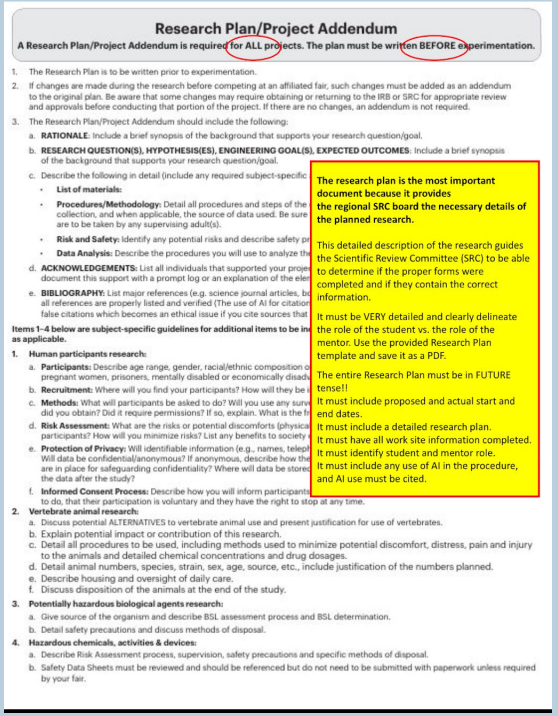

Forms

TEAM PROJECTS

- Every student needs to log in to their own account to complete Form 1B.
  - Select Fill/Edit for Form 1B and sign your name.
  - Then send the Parent Link for Form 1B to your parent.
  - Do not do this from another student's account, or you will overwrite their signatures.
- You also need to upload your own Participation Agreement in your own account.
- Please make sure that ALL team members individually complete all files and forms. The milestone will remain incomplete until ALL team members have finished filling out the forms.

Forms: Research Plan

- See the student research plan template linked below (also in Canvas)
- Make a copy to create your own research plan.
- Make sure to fill out the additional sections for human participants, vertebrate animals, etc. if they apply to your project.
- Once you are done with your research plan, copy and paste each section in the research plan in STEM Wizard.
- Student Research Plan

Research Plan/Project Addendum

A Research Plan/Project Addendum is required for ALL projects. The plan must be written BEFORE experimentation.

1. The Research Plan is to be written prior to experimentation.
2. If changes are made during the research before competing at an affiliated fair, such changes must be added as an addendum to the original plan. Be aware that some changes may require obtaining or returning to the IRB or SRC for appropriate review and approvals before conducting that portion of the project. If there are no changes, an addendum is not required.
3. The Research Plan/Project Addendum should include the following:
   a. **RATIONALE**. Include a brief synopsis of the background that supports your research question/goal.
   b. **RESEARCH QUESTION(S), HYPOTHESIS(ES), ENGINEERING GOAL(S), EXPECTED OUTCOMES**. Include a brief synopsis of the background that supports your research question/goal.
   c. Describe the following in detail (include any required subject-specific
      - **List of materials:**
      - **Procedures/Methodology:** Detail all procedures and steps of the collection, and when applicable, the source of data used. Be sure are to be taken by any supervising adult(s).
      - **Risk and Safety:** Identify any potential risks and describe safety pr
      - **Data Analysis:** Describe the procedures you will use to analyze th
   d. **ACKNOWLEDGEMENTS:** List all individuals that supported your proje document this support with a prompt log or an explanation of the ele
   e. **BIBLIOGRAPHY:** List major references (e.g. science journal articles, bo all references are properly listed and verified (The use of AI for citatio false citations which becomes an ethical issue if you cite sources that

Items 1–4 below are subject-specific guidelines for additional items to be in as applicable.

1. **Human participants research:**
   a. **Participants:** Describe age range, gender, racial/ethnic composition o pregnant women, prisoners, mentally disabled or economically disad
   b. **Recruitment:** Where will you find your participants? How will they be i
   c. **Methods:** What will participants be asked to do? Will you use any surv did you obtain? Did it require permissions? If so, explain. What is the fr
   d. **Risk Assessment:** What are the risks or potential discomforts (physica participants? How will you minimize risks? List any benefits to society
   e. **Protection of Privacy:** Will identifiable information (e.g., names, telep Will data be confidential/anonymous? If anonymous, describe how the are in place for safeguarding confidentiality? Where will data be store the data after the study?
   f. **Informed Consent Process:** Describe how you will inform participants to do, that their participation is voluntary and they have the right to stop at any time.
2. **Vertebrate animal research:**
   a. Discuss potential ALTERNATIVES to vertebrate animal use and present justification for use of vertebrates.
   b. Explain potential impact or contribution of this research.
   c. Detail all procedures to be used, including methods used to minimize potential discomfort, distress, pain and injury to the animals and detailed chemical concentrations and drug dosages.
   d. Detail animal numbers, species, strain, sex, age, source, etc., include justification of the numbers planned.
   e. Describe housing and oversight of daily care.
   f. Discuss disposition of the animals at the end of the study.
3. **Potentially hazardous biological agents research:**
   a. Give source of the organism and describe BSL assessment process and BSL determination.
   b. Detail safety precautions and discuss methods of disposal.
4. **Hazardous chemicals, activities & devices:**
   a. Describe Risk Assessment process, supervision, safety precautions and specific methods of disposal.
   b. Safety Data Sheets must be reviewed and should be referenced but do not need to be submitted with paperwork unless required by your fair.

The research plan is the most important document because it provides the regional SRC board the necessary details of the planned research.

This detailed description of the research guides the Scientific Review Committee (SRC) to be able to determine if the proper forms were completed and if they contain the correct information.

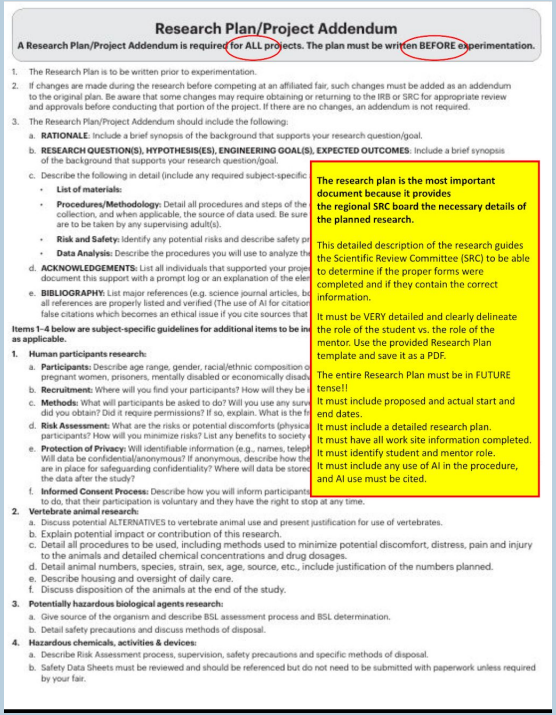

It must be VERY detailed and clearly delineate the role of the student vs. the role of the mentor. Use the provided Research Plan template and save it as a PDF.

The entire Research Plan must be in FUTURE tense!!
It must include proposed and actual start and end dates.
It must include a detailed research plan.
It must have all work site information completed.
It must identify student and mentor role.
It must include any use of AI in the procedure, and AI use must be cited.

Forms: Research Plan

Research Plan ADDENDUM:

- If any changes occur to a part of the Research Plan, students must include an Addendum.
- The Addendum is a summary of the changes and should go at the end of the Procedure section and any other sections that may have changed like Materials or Risk and Safety.
- NOTE: Some Addendums might require obtaining or returning to IRB/SRC approval!
  - If the procedure changes include anything that may increase risk, such as adding or changing human participants, vertebrate animals, PHBA, or hazardous devices/chemicals, students should obtain re-approval from their Adult Supervisor and if needed, IRB/SRC approval/ reapproval
  - If a student already has IRB/SRC approval but needs re-approval, students should upload additional forms into STEM Wizard in the Additional Forms section..
- To add the Addendum to the Research Plan in STEM Wizard:
  - Use FILL/EDIT for the Research Plan and AFTER the original procedure plan, add 'Addendum' and follow with a summary of the changes. Complete for other appropriate sections.
  - DO NOT change the original approved Research Plan - only ADD the changes.

Research Plan/Project Addendum

A Research Plan/Project Addendum is required for ALL projects. The plan must be written BEFORE experimentation.

1. The Research Plan is to be written prior to experimentation.
2. If changes are made during the research before competing at an affiliated fair, such changes must be added as an addendum to the original plan. Be aware that some changes may require obtaining or returning to the IRB or SRC for appropriate review and approvals before conducting that portion of the project. If there are no changes, an addendum is not required.
3. The Research Plan/Project Addendum should include the following:
   a. **RATIONALE**: Include a brief synopsis of the background that supports your research question/goal.
   b. **RESEARCH QUESTION(S), HYPOTHESIS(ES), ENGINEERING GOAL(S), EXPECTED OUTCOMES**: Include a brief synopsis of the background that supports your research question/goal.
   c. Describe the following in detail (include any required subject-specific
      - **List of materials:**
      - **Procedures/Methodology:** Detail all procedures and steps of the collection, and when applicable, the source of data used. Be sure are to be taken by any supervising adult(s).
      - **Risk and Safety:** Identify any potential risks and describe safety pr
      - **Data Analysis:** Describe the procedures you will use to analyze th
   d. **ACKNOWLEDGEMENTS:** List all individuals that supported your proje document this support with a prompt log or an explanation of the ele
   e. **BIBLIOGRAPHY:** List major references (e.g. science journal articles, b all references are properly listed and verified (The use of AI for citatio false citations which becomes an ethical issue if you cite sources that

Items 1-4 below are subject-specific guidelines for additional items to be in as applicable.

1. **Human participants research:**
   a. **Participants:** Describe age range, gender, racial/ethnic composition o pregnant women, prisoners, mentally disabled or economically disad
   b. **Recruitment:** Where will you find your participants? How will they be i
   c. **Methods:** What will participants be asked to do? Will you use any surv did you obtain? Did it require permissions? If so, explain. What is the fr

It must include proposed and actual start and end dates.
It must include a detailed research plan.
It must have all work site information completed.
It must identify student and mentor role.
It must include any use of AI in the procedure, and AI use must be cited.

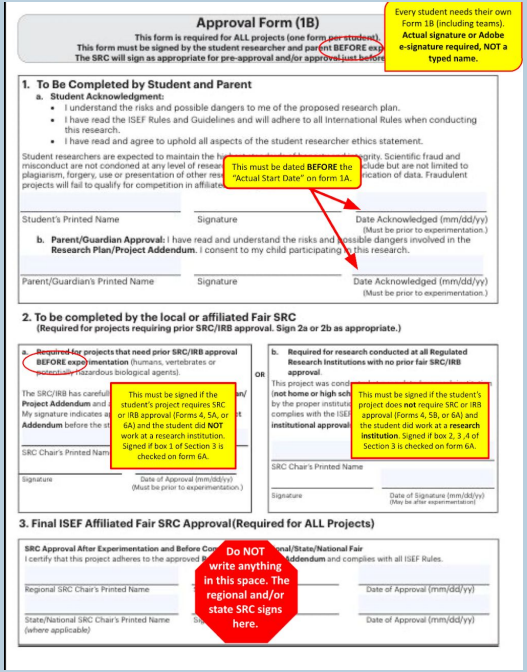

Forms: 1

- Must be filled out by all students
- Once completed, send the form to Mrs. Phillips using the “send link” button **IN STEM WIZARD**

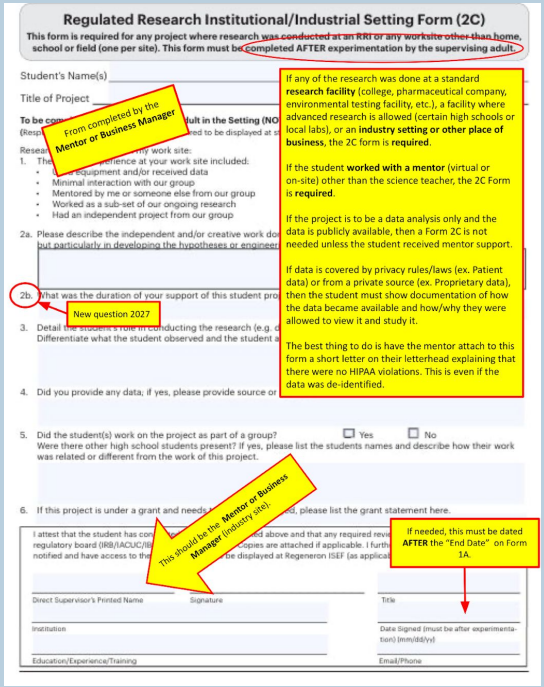

Forms: 1a/1b

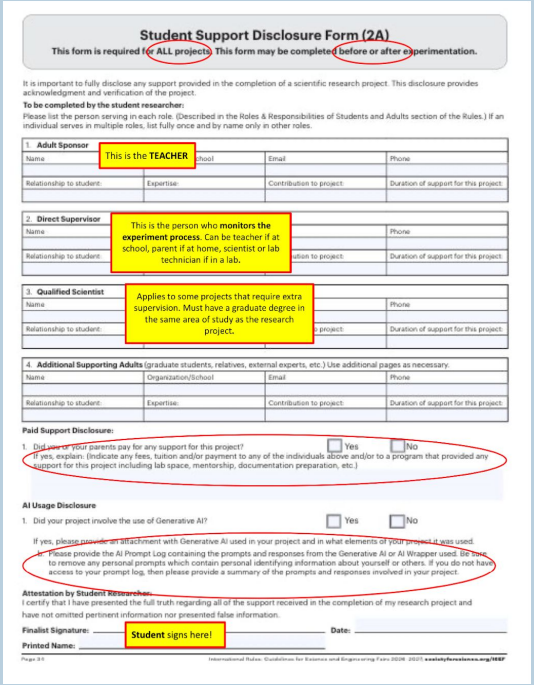

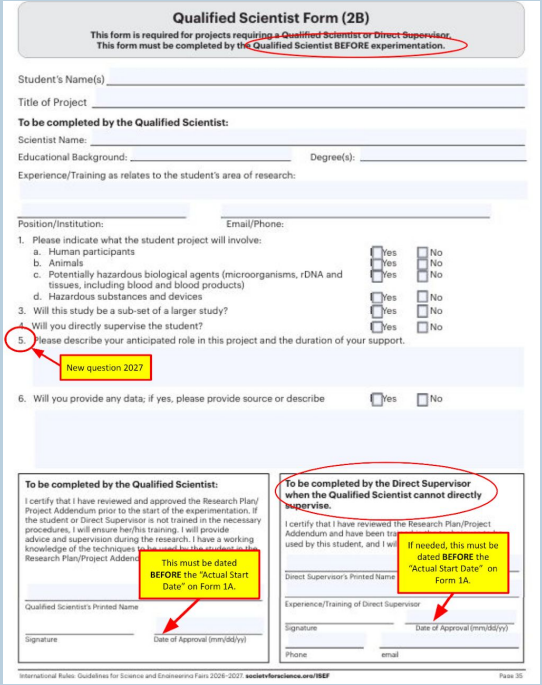

- Must be filled out by all students
- For teams, make sure **each student** fills it out

Forms: 2a/2b/2c

- 2a must be filled out by all students
- For teams, make sure **each student** fills it out

Forms: 3

Hazardous Materials, Activities, Devices: Risk Assessment Form (3)

a. Chemicals, poison, acid, petroleum products, paint, glue, fertilizer etc.

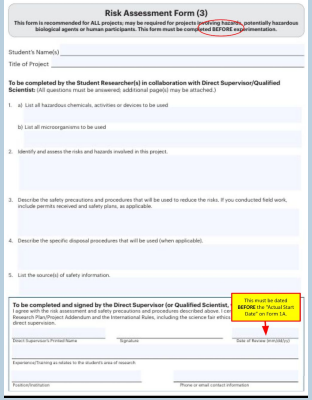

b. Power tools, knives, sharp or dangerous objects, machinery

c. Fire, heat, oven, burner, radiation, electricity, flammable materials/substances

d. Any other potentially dangerous situation or activity

e. Exempt Micro-Biology, E-coli k12, algae, biofuel, bio-fuel cells, etc.

f. Projects that involve human participant testing of any project involving student- designed inventions, prototypes or consumer products

Risk Assessment Form (3)

This form is recommended for ALL projects; may be required for projects involving hazards, potentially hazardous biological agents or human participants. This form must be completed BEFORE experimentation.

Student's Name(s) _____

Title of Project _____

To be completed by the Student Researcher(s) in collaboration with Direct Supervisor/Qualified Scientist: (All questions must be answered; additional page(s) may be attached.)

1. a) List all hazardous chemicals, activities or devices to be used

   b) List all microorganisms to be used

2. Identify and assess the risks and hazards involved in this project.

3. Describe the safety precautions and procedures that will be used to reduce the risks. If you conducted field work, include permits received and safety plans, as applicable.

4. Describe the specific disposal procedures that will be used (when applicable).

5. List the source(s) of safety information.

To be completed and signed by the Direct Supervisor (or Qualified Scientist,

This must be dated **BEFORE** the "Actual Start Date" on form 1A.

I agree with the risk assessment and safety precautions and procedures described above. I (or Research Plan/Project Addendum and the International Rules, including the science fair ethics direct supervision.

Direct Supervisor's Printed Name | Signature | Date of Review (mm/dd/yy)

Experience/Training as relates to the student's area of research

Position/Institution | Phone or email contact information

Forms: 3

Hazardous Materials, Activities, Devices: Risk Assessment Form (3)

CHEMICALS (New for 2026 - revised by ISEF 10/2/25) -

1. All projects using chemicals in a home, school, or lab setting must be conducted under the following conditions:
   a. Obtain and read the Safety Data Sheets (SDS) for each chemical being used. *
   b. Follow standard lab practices for chemical handling, safety, ventilation, and specific disposal procedures as outlined in the Safety Data Sheets (SDS).
   c. Cannot reuse any cookware, utensils, and/or equipment used during the experimentation for regular household use.
   d. Be conducted with a Direct Supervisor with proper training and knowledge of the chemicals being used.
2. Safety Data Sheets can be found on the google classroom and here

Forms: 4

Human Participant Study: Human Participant Form (4) (IRB Pre-Approval)

a. Surveys,tests, opinion studies, etc.

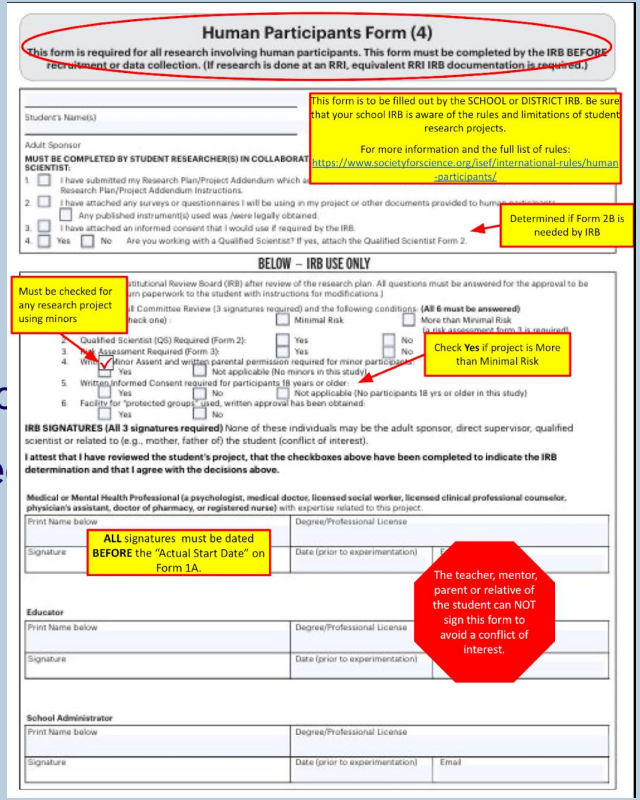

b. Tasting, smelling, exercise, etc.

c. Medical procedures, blood sugar, blood pressure, DNA kit, etc

d. Using other people to test a product you created or purchase

e. Any research involving humans **(including yourself)** as test subject

f. If the study is done at a regulated research institution, IRB approval is required from the institution, not the school.

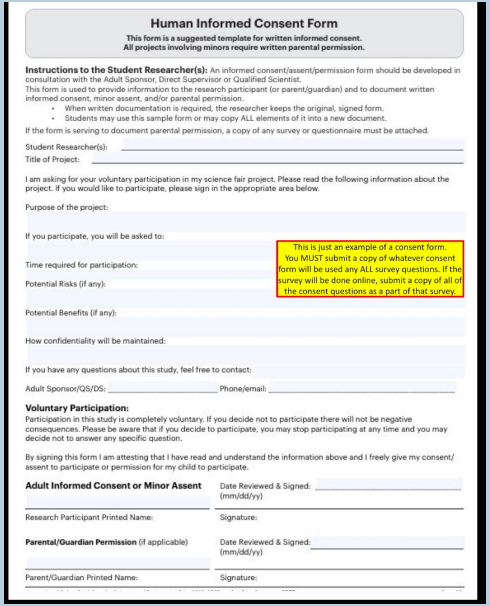

Forms: 4

Human Participant Study: Human Participant Form (4) (IRB Pre-Approval)

• New for 2026 - All human participant projects that include minors as participants are required to have parental written consent.

• New for 2026 - Human participant studies where data is collected at a facility where people live or attend programming (day care, nursing home, prison, etc.) will require written permission from the facility prior to beginning experimentation. This documentation needs to be reviewed by the IRB (question #6 on Form 4 for Senior Division). There is not a form, but a signed document from an authorized person at the facility needs to be uploaded as an additional file in STEM Wizard.

Human Informed Consent Form

This form is a suggested template for written informed consent.
All projects involving minors require written parental permission.

Instructions to the Student Researcher(s): An informed consent/assent/permission form should be developed in consultation with the Adult Sponsor, Direct Supervisor or Qualified Scientist.
This form is used to provide information to the research participant (or parent/guardian) and to document written informed consent, minor assent, and/or parental permission.

- When written documentation is required, the researcher keeps the original, signed form.
- Students may use this sample form or may copy ALL elements of it into a new document.

If the form is serving to document parental permission, a copy of any survey or questionnaire must be attached.

Student Researcher(s): _____

Title of Project: _____

I am asking for your voluntary participation in my science fair project. Please read the following information about the project. If you would like to participate, please sign in the appropriate area below.

Purpose of the project:

If you participate, you will be asked to:

Time required for participation:

Potential Risks (if any):

This is just an example of a consent form. You MUST submit a copy of whatever consent form will be used any ALL survey questions. If the survey will be done online, submit a copy of all of the consent questions as a part of that survey.

Potential Benefits (if any):

How confidentiality will be maintained:

If you have any questions about this study, feel free to contact:

Adult Sponsor/QS/DS: _____ Phone/email: _____

Voluntary Participation:
Participation in this study is completely voluntary. If you decide not to participate there will not be negative consequences. Please be aware that if you decide to participate, you may stop participating at any time and you may decide not to answer any specific question.

By signing this form I am attesting that I have read and understand the information above and I freely give my consent/assent to participate or permission for my child to participate.

Adult Informed Consent or Minor Assent Date Reviewed & Signed: _____ (mm/dd/yy)

Research Participant Printed Name: _____ Signature: _____

Parental/Guardian Permission (if applicable) Date Reviewed & Signed: _____ (mm/dd/yy)

Parent/Guardian Printed Name: _____ Signature: _____

Forms: 4

Human Participant Projects

Studies involving human participants are highly regulated in order to keep the researchers and the participants safe. Please make sure you carefully review the **ISEF rules for human participants**. ← link to rules

Online Surveys

All online surveys should have a statement similar to the one recommended by ISEF

"There is always the possibility of tampering from an outside source when using the internet for collecting information. While the confidentiality of your responses will be protected once the data are downloaded from the internet, there is always a possibility of hacking or other security breaches that could threaten the confidentiality of your responses. Please know that you are free to decide not to answer any question."

This statement should be set up so that participants have to click a button to acknowledge reading the information and agreeing to participate. This is an ISEF rule and not up to the student to decide.

Forms: 4

Examples:

Project Type	Project Explanation	Human Involvement	Form 4 Requirement	Form 3 Requirement
Engineering	Computer software created by student researcher	20 Students tested the software	Required	Required
Engineering	Computer software created by student researcher	Researcher or teacher tested software	Exempt	Required
Engineering	Student created system where video game only works when a bicycle is used	Researcher or teacher tested the system	Required	Required
Experiment	Blood pressure tested while playing different video games	Researcher	Required	Not for the human participants
Experiment	Bacteria cultured from hands after using different hand sanitizers	Researcher	Required	Not for the human participants

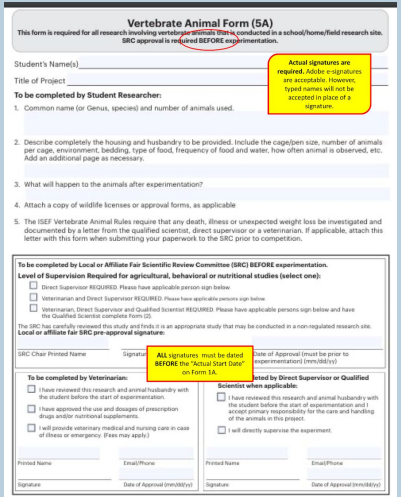

Forms: 5a/5b

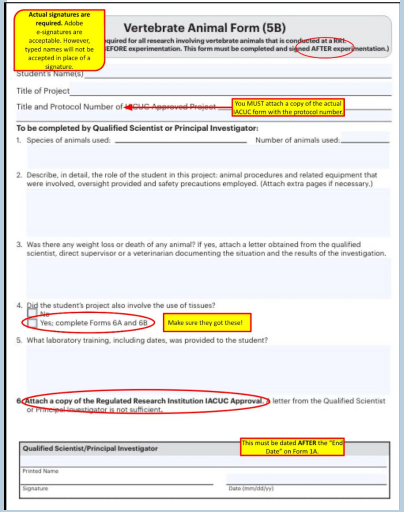

Vertebrate Animal Study: Vertebrate Form (5A) or (5B) (SRC Pre-Approval)

a. Involves any vertebrate animal (dog, cat, fish, chicken, birds, reptiles, etc.)

New Rules for 2026:

a. Cephalopods are to be treated as vertebrate animals.
b. Students are prohibited from fishing with barbed hooks, live bait, or electrofishing

Forms: 6a

Vertebrate Tissue: Biological Agents Form (6A) & Tissue Form (6B) (SRC Pre-Approval)

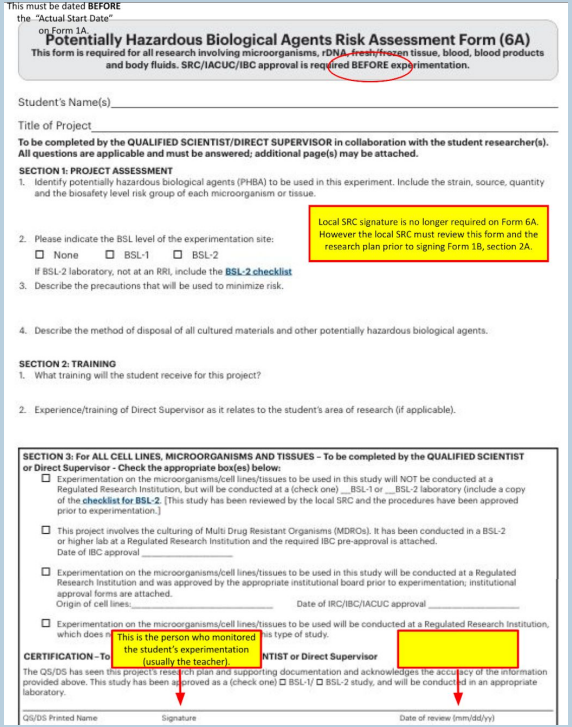

a. Blood, blood products (from vertebrate animals or humans)

b. Saliva/other bodily fluids (from vertebrate animals or humans)

c. Cell or Tissue(from vertebrate animals or humans)

Biological Agents (microbiology): Hazardous Biological Agents Form (6A) (SRC Pre-Approval)

A. PHBA include bacteria, viruses, fungi, parasites, rDNA technologies, human or animal fresh/frozen tissues, blood, or body fluids.
B. Students may not work with prions or purified prion-like proteins, including amyloid-b, tau, a-synuclein, transactive response DNA-binding protein of 43 kDa, and amyloid fibrils.
C. Studies involving animals or animal tissues that have been bred to express prion-like proteins (such as C. elegans and Drosophila) are permissible if conducted in a BSL-2 laboratory setting.
D. Senior Division projects with PHBA require a Form 6A and SRC pre-approval. If they also involve human or animal vertebrate tissue such as cells, tissue, blood, or other body fluids, then a form 6B is also required.
E. Culturing bacteria, mold, or other microorganisms can't be done at home.
F. If environmental bacteria is cultured, it is only BSL-1 if the plates are sealed, not re-opened, and disposed of properly.
G. Must dispose of properly by autoclaving or treating with 10% bleach solution prior to disposal.

This must be dated **BEFORE** the "Actual Start Date" on Form 1A.

Potentially Hazardous Biological Agents Risk Assessment Form (6A)

This form is required for all research involving microorganisms, rDNA, fresh/frozen tissue, blood, blood products and body fluids. SRC/IACUC/IBC approval is required BEFORE experimentation.

Student's Name(s)_____

Title of Project_____

To be completed by the QUALIFIED SCIENTIST/DIRECT SUPERVISOR in collaboration with the student researcher(s). All questions are applicable and must be answered; additional page(s) may be attached.

SECTION 1: PROJECT ASSESSMENT

1. Identify potentially hazardous biological agents (PHBA) to be used in this experiment. Include the strain, source, quantity and the biosafety level risk group of each microorganism or tissue.
2. Please indicate the BSL level of the experimentation site:
   ☐ None ☐ BSL-1 ☐ BSL-2
   If BSL-2 laboratory, not at an RRI, include the **BSL-2 checklist**
3. Describe the precautions that will be used to minimize risk.
4. Describe the method of disposal of all cultured materials and other potentially hazardous biological agents.

Local SRC signature is no longer required on Form 6A. However the local SRC must review this form and the research plan prior to signing Form 1B, section 2A.

SECTION 2: TRAINING

1. What training will the student receive for this project?
2. Experience/training of Direct Supervisor as it relates to the student's area of research (if applicable).

SECTION 3: For ALL CELL LINES, MICROORGANISMS AND TISSUES – To be completed by the QUALIFIED SCIENTIST or Direct Supervisor - Check the appropriate box(es) below:

☐ Experimentation on the microorganisms/cell lines/tissues to be used in this study will NOT be conducted at a Regulated Research Institution, but will be conducted at a (check one) ___BSL-1 or ___BSL-2 laboratory (include a copy of the **checklist for BSL-2**. [This study has been reviewed by the local SRC and the procedures have been approved prior to experimentation.]

☐ This project involves the culturing of Multi Drug Resistant Organisms (MDROs). It has been conducted in a BSL-2 or higher lab at a Regulated Research Institution and the required IBC pre-approval is attached.
Date of IBC approval _____

☐ Experimentation on the microorganisms/cell lines/tissues to be used in this study will be conducted at a Regulated Research Institution and was approved by the appropriate institutional board prior to experimentation; institutional approval forms are attached.
Origin of cell lines:_____ Date of IRC/IBC/IACUC approval _____

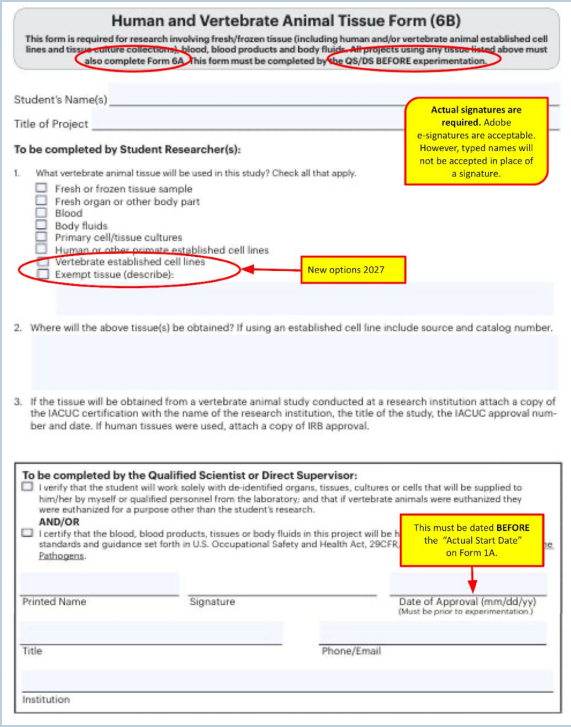

☐ Experimentation on the microorganisms/cell lines/tissues to be used will be conducted at a Regulated Research Institution, which does [illegible] this type of study.

CERTIFICATION – To [illegible] NTIST or Direct Supervisor

The QS/DS has seen this project's research plan and supporting documentation and acknowledges the accuracy of the information provided above. This study has been approved as a (check one) ☐ BSL-1/ ☐ BSL-2 study, and will be conducted in an appropriate laboratory.

QS/DS Printed Name | Signature | Date of review (mm/dd/yy)

This is the person who monitored the student's experimentation (usually the teacher).

Human and Vertebrate Animal Tissue Form (6B)

This form is required for research involving fresh/frozen tissue (including human and/or vertebrate animal established cell lines and tissue culture collections), blood, blood products and body fluids. All projects using any tissue listed above must also complete Form 6A. This form must be completed by the QS/DS BEFORE experimentation.

Student's Name(s)_____

Title of Project_____

To be completed by Student Researcher(s):

1. What vertebrate animal tissue will be used in this study? Check all that apply.
   ☐ Fresh or frozen tissue sample
   ☐ Fresh organ or other body part
   ☐ Blood
   ☐ Body fluids
   ☐ Primary cell/tissue cultures
   ☐ Human or other primate established cell lines
   ☐ Vertebrate established cell lines
   ☐ Exempt tissue (describe):
2. Where will the above tissue(s) be obtained? If using an established cell line include source and catalog number.
3. If the tissue will be obtained from a vertebrate animal study conducted at a research institution attach a copy of the IACUC certification with the name of the research institution, the title of the study, the IACUC approval number and date. If human tissues were used, attach a copy of IRB approval.

Actual signatures are required. Adobe e-signatures are acceptable. However, typed names will not be accepted in place of a signature.

New options 2027

To be completed by the Qualified Scientist or Direct Supervisor:

☐ I verify that the student will work solely with de-identified organs, tissues, cultures or cells that will be supplied to him/her by myself or qualified personnel from the laboratory; and that if vertebrate animals were euthanized they were euthanized for a purpose other than the student's research.

AND/OR

☐ I certify that the blood, blood products, tissues or body fluids in this project will be h[illegible] standards and guidance set forth in U.S. Occupational Safety and Health Act, 29CFR[illegible] Pathogens.

Printed Name | Signature | Date of Approval (mm/dd/yy) (Must be prior to experimentation.)

Title | Phone/Email

Institution

This must be dated **BEFORE** the "Actual Start Date" on Form 1A.

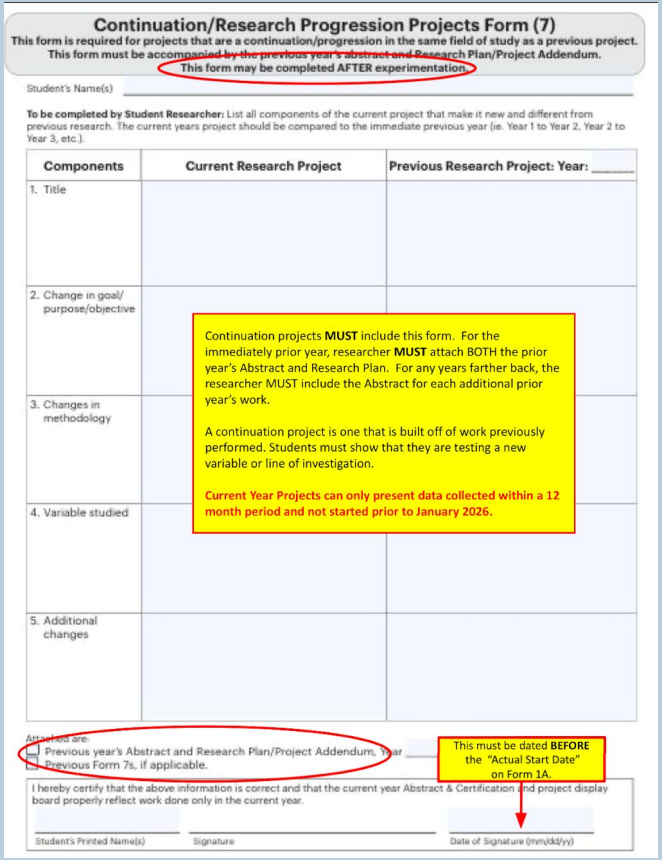

Forms: 7

Continuation Project: Continuation Form (7)

a. Project related to previous year's research

b. Students will be judged only on laboratory experiment/ data collection performed over 12 continuous months beginning no earlier than January 2026 and ending May 2027.

c. The display board and abstract must reflect the current year's work only. The project title displayed in the finalist's booth may mention years (for example, "Year Two of an Ongoing Study"). Previous year's databooks, research papers and supporting documents may be at the booth if properly labeled as such.

Continuation/Research Progression Projects Form (7)

This form is required for projects that are a continuation/progression in the same field of study as a previous project.
This form must be accompanied by the previous year's abstract and Research Plan/Project Addendum.

This form may be completed AFTER experimentation.

Student's Name(s) _____

To be completed by Student Researcher: List all components of the current project that make it new and different from previous research. The current years project should be compared to the immediate previous year (ie. Year 1 to Year 2, Year 2 to Year 3, etc.).

Components	Current Research Project	Previous Research Project: Year: _____
1. Title		
2. Change in goal/ purpose/objective		
3. Changes in methodology		
4. Variable studied		
5. Additional changes		

Continuation projects **MUST** include this form. For the immediately prior year, researcher **MUST** attach BOTH the prior year's Abstract and Research Plan. For any years farther back, the researcher MUST include the Abstract for each additional prior year's work.

A continuation project is one that is built off of work previously performed. Students must show that they are testing a new variable or line of investigation.

Current Year Projects can only present data collected within a 12 month period and not started prior to January 2026.

Attached are:
☐ Previous year's Abstract and Research Plan/Project Addendum, Year _____
☐ Previous Form 7s, if applicable.

This must be dated **BEFORE** the "Actual Start Date" on Form 1A.

I hereby certify that the above information is correct and that the current year Abstract & Certification and project display board properly reflect work done only in the current year.

Student's Printed Name(s) | Signature | Date of Signature (mm/dd/yy)

Forms: Overview

Three Project Warning Flags!!!

Stop and read the rules or ask questions!!!

Human Participants:
(Form 4)

Humans as participants

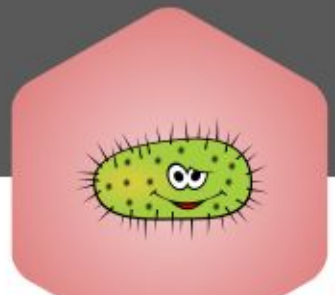

require prior IRB approval

Vertebrate Animals:
(Form 5)

Vertebrate Animal studies

require prior SRC approval

Microbiology PHBA
(Form 6)

CAN'T BE DONE AT HOME

Requires prior SRC approval

Forms: IRB (Institutional Review Board)

- Human Participant Studies – require pre-approval
  - All three members must sign ISEF Form 4 (Senior Division)
    - School Administrator
    - Medical or Mental Health Professional (minimum of RN or licensed social worker)
    - Educator
  - You can have more than three members on the committee
  - One member signs Form 1B, section 2a (Senior Division)
  - The adult sponsor, parent or close relative of the student, direct supervisor, qualified scientist, or mentor may not serve on the IRB for that student.
  - Projects involving human participants that are done at a regulated research institution (RRI) require IRB approval from the RRI. The school IRB is not sufficient.

Forms: SRC (Scientific Review Committee)

- Vertebrate Animals and Microbiology(microorganisms, blood, bodily fluids, etc.) Projects – require pre-approval
  - Three member on the SRC (Senior Division)
    - Biomedical Expert: graduate degree in Microbiology, Biomedical Research, related field or equivalent experience
    - Educator
    - One other member
  - Multiple people can be chairs of the SRC, but only 1 chair must sign Forms 5A (vertebrate animals) and/or Form 1B, section 2a (Senior Division)
  - For projects involving vertebrate animals that are done at a regulated research institution (RRI), a Form 5B and a copy of the IACUC for the project is required.

BSL-2 projects will no longer be allowed to be performed at school. These projects must be done at a regulated research institution and supervised by a qualified scientist (GARSEF rule for 2026).

- Culturing unknown bacteria the student(s) collected is only BSL-1, if the samples are sealed and not reopened.
- Any project where the student cultures unknown bacteria from the environment and then opens the test tube or petri dish to subculture or analyze the sample is a BSL-2 project.

More Club Info: Meetings

- Meetings will be held on Wednesdays, usually the first Wednesday of the month
- Some months do have more frequent meetings depending on how busy it is in terms of due dates, action items, etc.

- Future Meeting Dates:
  - 11/18
  - 12/2
  - 12/16
  - 1/6
  - 2/3
  - 2/10
- **NEXT MEETING ON Wednesday, November 18th**

Thank You!!
