Student STEM Wizard Guide
Registration

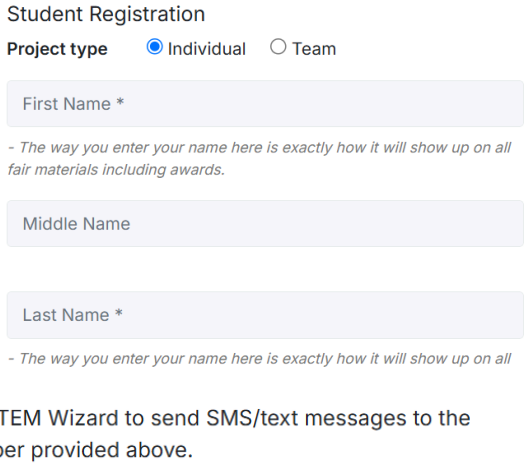

Registration:

Step 1: Go to **STEM Wizard** and select the correct Registration option. Student will be one of the options in the drop-down menu.

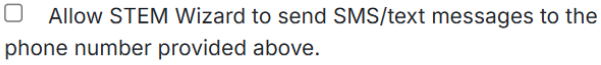

Step 2: Student Registration- complete the STEM Wizard Account Creation Worksheet prior to completing this portion to ensure that you have all the necessary information.

To begin the registration process you will need to indicate whether the project is **individual** or **team**.

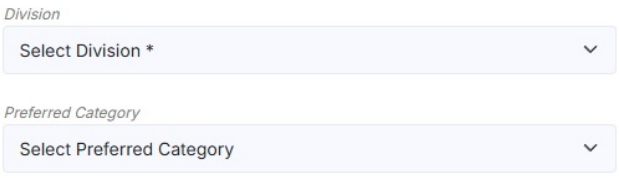

Once selected, the remainder of the Student Registration is fairly basic, - your name, address, username, password, etc.(information from the Worksheet) *(information collected will not be shared).*
Recommendation: the secondary email should be a parent's email to ensure parents/guardians stay informed

If you select Team, each team member must register and complete the Project Information and Student Information milestones.
Project Type (individual/team) can not be changed later.

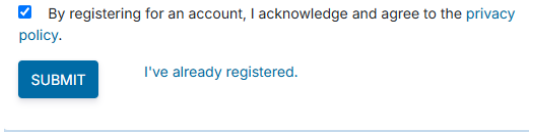

Step 3: Select whether or not to allow STEM Wizard to send SMS/text messages to the number provided. (Ask your parents/guardians)

Step 4: Select your Division: Junior (6th-8th) or Senior (9th-12th).
Next Select Preferred Category. This can be changed later

Step 5: Check the box next to the privacy statement and click **SUBMIT**.

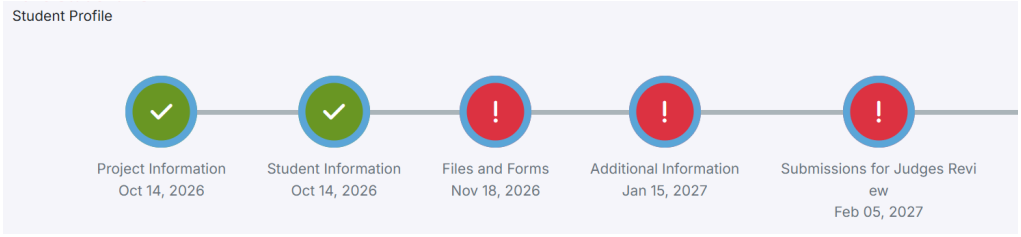

You will be taken back to your dashboard.
Your teacher will not be able to see your account until you have completed and submitted both the Project Information and the Student Information.

Dashboard and Messages

Dashboard

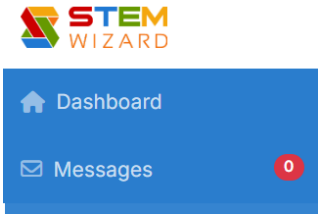

This page displays all the milestones that you will be required to complete, as well as announcements from the fair admin. If you click on any of the colored milestone circles, it will take you to the page to complete or edit that milestone *(i.e. clicking on the Files and Forms milestone will take you to that page).*

Using Messages

You will receive messages from the fair admin and your assigned teacher on this page. You can also send messages to the fair admin and your teacher.

Messages:

Step 1: When you first log into your account, look to the left-hand side of the screen, you will find a column menu with several options. Beneath the Dashboard option is your Messages option. This will take you to your Inbox and allow you to send Messages within STEM Wizard.

This is an important tool to utilize for questions you have about the science fair, your project, forms, etc. It is important to **check your messages** to make sure that your administrator or teacher has not sent you information concerning un-met requirements of your project. Responding to messages from your administrator or teacher from your personal e-mail will not work. You must respond to messages from within Messages.

Step 2: On your Inbox page, there will be a New Message button. In order to Message your administrator or teacher with questions, you click this button. This will open up a New Message window. Simply write your Message and hit send!

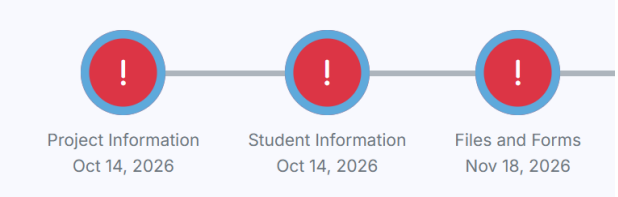

Should you have any questions regarding your account, please use Messages to contact the Fair Administrator.

Completing Your Milestones

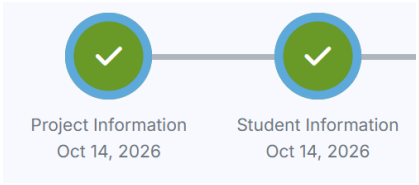

Step 1: After logging into your account, you will automatically be taken to your Dashboard. To get to your Milestones from another page, simply select the Dashboard link on the navigation bar to the left.

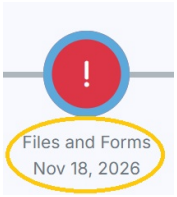

The first time you log into your account, it will look a little like this:

Step 2: You must complete and save your **Project Information Milestone and your Student Information Milestone** before you will be allowed to begin filling out your other Milestones. To get to each milestone, click on the round symbol above the name and you will be taken to that page. You follow this same procedure until you have finished all your Milestones.

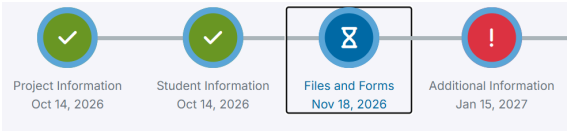

Dates and Deadlines: Milestones have a **recommended date** or a **deadline** associated with them. These will be displayed below the milestone name. **Make sure you complete each milestone on time.**

It is the responsibility of the teacher, student, and parent/guardian to make sure that all required signatures for the project are completed on the paperwork prior to experimentation.The regional SRC will not review paperwork until after the January deadline; however, at that time signature dates will be checked and projects that are missing the signatures required prior to experimentation will be disqualified.

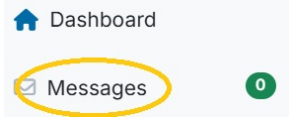

Understanding the Symbols: Any milestones not completed will be marked with a red exclamation point. All Milestones will be marked this way initially.

When you have completed a Milestone that requires approval by your fair administrator, it will turn to the hourglass symbol. The symbol will remain an hourglass until it is approved by your administrator. Once approved, it will automatically turn to a green check mark.

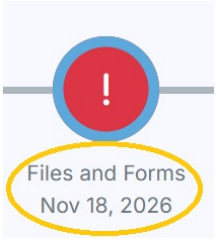

Milestones that don't require your administrator's approval will automatically turn to a green check mark once completed and saved.

Should you have any questions regarding your Milestones, please use the Messages link on the left-hand side of the screen to contact your teacher or administrator.

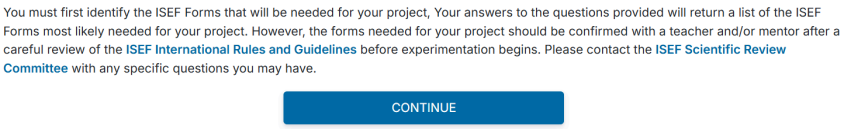

Files and Forms

Step 1: Once you have created your account, and completed your Project Information and Student Information milestones, the next very important step is filling out the files and forms that are required for your project. These need to be completed prior to experimentation.
Examples:Participation Agreement and ISEF forms

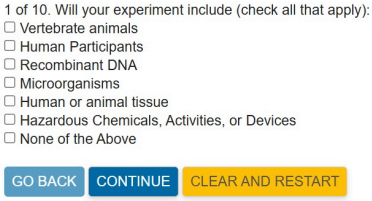

Step 2:
Senior Division students, click on the Files and Forms milestone and read the applicable instructions.

You must first identify the ISEF Forms that will be needed for your project by using the Forms Wizard located at the bottom of the screen. **Click Continue** to proceed to the questions.

Make sure you are answering all questions accurately and honestly to ensure you have the proper forms for pre-approval. Once you have completed the questions and submitted them, you will receive a "Congratulations Message"

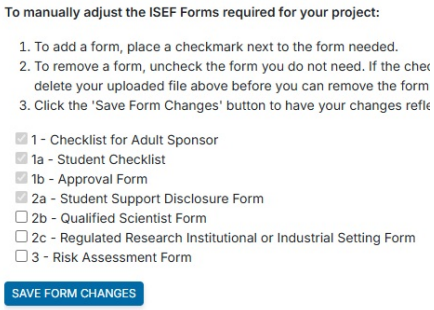

Click **Continue** and the forms needed for your specific project will be populated in STEM Wizard. Check ISEF Rules and confirm with your teacher that you have all of the required forms before beginning experimentation. ALL forms will be completed in STEM Wizard! Make sure they are completed and signed prior to experimentation.

Junior Division students, Click on the Files and Forms milestone and read the Junior Division information. Scroll down to see the section that contains the forms required to be submitted to the fair. The **MS Safety and Consent Form** must be completed and have ALL signatures BEFORE experimentation.

If the MS Mentor and Research Location Form is needed, a signed copy will need to be uploaded into the Additional Files section of STEM Wizard. (see **Additional Files Instructions** below)

Step 3: **Senior Division** students, you can manually adjust forms as needed. At the bottom of the page, you will have a list of all forms that will have check marks next to the files needed for your project. Files with a grey check mark are mandatory and cannot be removed.

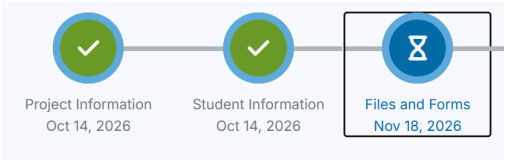

Adding a form - If there are additional forms required for your project, you simply put a check mark next to that form name, click "Save Form Changes" button, and the form will be available for you.
Deleting/Removing a Form: if you need to remove a form uncheck the form in the list at the bottom of the page and click "Save Form Changes"
Step 4: **ALL students**, any forms that need to be filled out in STEM Wizard will have a blue "FILL/EDIT FORM" button next to them. Click that button and fill out the required information. Then click "Send Link". You will need to know the

email address of the person who needs to sign your form. For some forms, there are multiple people who need to sign the document. Choose the correct "Approver Type" before emailing the link. You will receive a message when the form is signed. Click the blue file name to view the file. Make sure it is complete and signed by all required individuals. Then click "Submit".
See "Completing Paperless Files and Forms in STEM Wizard slides" for more detailed instructions.

Step 5:

When all files and forms have been completed and submitted the Files and Forms Milestone icon will turn to an hourglass until all files and forms are approved by the Fair Administrator.

Check your messages in the Messages option on the left-hand side of the screen for notes from your administrator in case you need to edit and re-submit your forms.

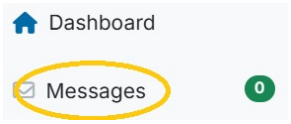

If you need to edit a form or file that was previously uploaded, click on the blue FILE/EDIT box and make the necessary changes. If the form requires approval, resend to the approvers to obtain new signatures and dates (see Step 4). Once the edits and signatures are complete, click the SUBMIT button to resubmit the edited file or form.

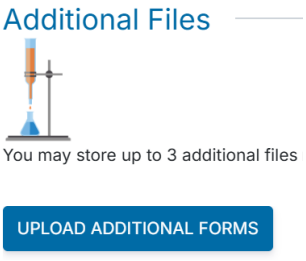

When your files and forms have been officially approved, the Files and Forms Milestone icon turns to a green check mark, indicating that your Files and Forms milestone is complete.

Should you have any questions regarding your Milestones, please use the Messages link on the left-hand side of the screen to contact your teacher or administrator.

Additional Files

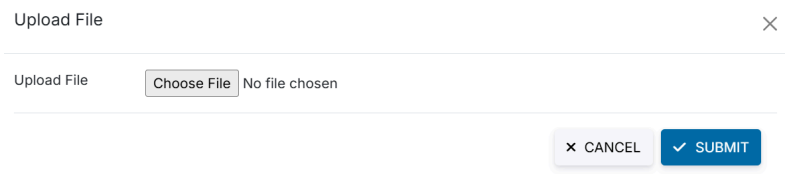

Additional Files is a place for you to add up to 3 files that pertain to your project. Examples: surveys/tests for human participants (online surveys should be added as a link to Research Plan), drafts of your project or pictures of your display, or JR MS Mentor and Location Form.
DO NOT UPLOAD ISEF FORMS HERE.

Junior Division students- If your project requires the **MS Mentor and Location Form,** you will need to print the form, obtain the correct signatures, scan it as a pdf into your phone/computer and upload to STEM Wizard in Additional Files. **Do not upload the form until it is complete with all required signatures.**

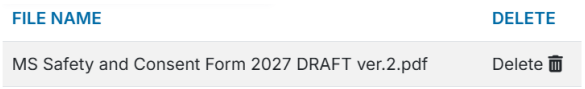

Please use an app such as Genius Scan, Notes (iPhone), Cam Scan,Smart Doc Scan,

Google Drive (android or computer) or Office Lens on your phone that converts your images to pdfs. ***Do not take photos of the documents.***

To upload files, click on the “UPLOAD ADDITIONAL FORMS” button. When you click on the “Upload FORMS” button, it will prompt you with a window to select and submit your file. Make sure you only upload PDFs.

Please upload the files one at a time (one computer file for each form). After uploading, your file name will appear and you will have the ability to access the file later or to delete the file.

Frequently Asked Questions

Student:

Q: Can projects be changed from individual to team after the account is created?

A: No. You must select the project type, individual or team, when creating the account. It cannot be changed later.

Q: Can category or title be changed later?

A: Yes. Prior to advancing to the regional fair, you can change the category or title by clicking on the Project Information milestone.

Q: What should I do if my teacher or class period changes?

A: Click on the Project Information milestone and change your class period and/or teacher.

Q: What happens if I don’t meet my milestones?

A: You may be deactivated by your teacher or the fair administrator. If this happens, you will not be allowed to compete in the regional science fair.
